QUALITY POLICY

Temperature Controls Pty. Ltd is the market leader in Australia for the manufacture of thermocouples, resistance temperature detectors, thermowells and liquid level switches. Our aim is to provide our clients with a “total measurement solution”, we also distribute a range of associated products to compliment our manufactured production; and maintain a NATA Accredited temperature laboratory in the Sydney workshop.

It is the intent of Temperature Controls to provide

1. All our external stakeholders with only the highest standard of product and service at a cost that is agreeable to all parties. Constant research and development will ensure that we can offer these stakeholders leading edge temperature measurement products.
2. All our internal stakeholders with a working environment that will encourage and foster a high level of self-satisfaction and fulfillment as well as management commitment to providing a platform for a philosophy of Continuous Improvement. This will be achieved by setting measurable objectives that will be used to continually improve the management system.
3. Management commitment to provide products and services that comply with the applicable Regulatory Authorities and Standards.
4. A work ethic that will promote an atmosphere where workplace safety is at the forefront of all policies, decisions and everyday activities by all personnel.

The principles and doctrines set out in ISO9001:2015 have been implemented throughout Temperature Controls Pty. Ltd. This will provide the framework for assuring the intents are met.
