

## CALYS 50

Field multifunction calibrator for basic use

CALYS 50 field multifunction calibrator is the perfect tool for advanced process maintenance and use on test bench in all industries. Suitable for all field and lab measurements, it can simultaneously measure and generate over two isolated channels various signals of temperature, resistance, process and frequency in one single instrument.

# Description

CALYS 50 is a basic multifunction calibrator within CALYS range. It is the perfect tool for advanced process maintenance and use on test bench in all industries. Suitable for all field and lab measurements, it can simultaneously measure and generate over two isolated channels various signals of temperature, resistance, process and frequency in one single instrument.

It provides **extended functionalities** (temperature simulation, scaling, steps, synthesizer, statistical functions...), easily accessible through quick menus by function.

The instrument simultaneously measures and simulates:

- Temperature: Up to 0,014% RDG
- Resistance: Up to 0,012% RDG, 4 KΩ range
- Current: Up to 0,0175% RDG, 50 mA range + 24 V loop supply
- Voltage: Up to 0,013% RDG, 50 V range
- Frequency: Up to 0,005% RDG, 20 KHz range (10 KHz in simulation)

IP 54, fully protected by an antichoc rubber holster, CALYS 50 integrates "easyconnect" terminals and a wide backlite display that makes it easy to use in any severe or dark conditions.

## Easy connection system

Connect your probes by simply pushing on the terminal top and insert wires of up to 3 mm or 10 AWG diameter and compensated thermocouple connectors.

Wires are held tight between two brass plates ensuring thermal stability and a very good cold junction compensation for thermocouples.

This system also enables 4 mm banana plugs and security connectors to be connected on the terminal top.

Resistive probes measurements in 2, 3 or 4 wires: automatic recognition of number of connected wires, with indication on screen

Accuracies are given for 4-wire mounted probes

Take into account particular error of temperature sensor used and implementation conditions

Measuring current: 0.25 mA (Measurement) or from 0.1 to 1 mA (Emission)

Temperature coefficient: < 10% of accuracy /°C

Thermocouples: D and G, for specifications, refer to the instruction manual (Available on request)

Accuracy is given for reference @ 0°C.

When using the internal reference junction (except couple B) add an additional uncertainty of 0.2 °C at 0 °C.

It is possible (thermocouple B excepted) to choose by programming the cold junction localization: External at 0°C, internal (temperature compensation of instrument's terminals) or manually entered.

Temperature coefficient: <10% of accuracy /°C

Display unit: °C and F

Resistance measurement in 2, 3 or 4 wires: automatic recognition of number of connected wires, with indication on screen

Accuracies are given for 4-wire mounted probes

Temperature coefficient: < 7 ppm/°C beyond reference domain

Open circuit terminal voltage: < 10 V

Continuity test: Open circuit for R > 1000 Ω and closed circuit for R < 1000 Ω

Measurement current: 0.25 mA

## DC current: Emission

With or without loop supply

| Range   | Resolution | Accuracy / 1an     |
|---------|------------|--------------------|
| 24 mA   | 1 µA       | 0.0175% RDG + 2 µA |
| 4-20 mA | 1 µA       | 0.0175% RDG + 2 µA |
| 0-20 mA | 1 µA       | 0.0175% RDG + 2 µA |

Temperature Coefficient < 10 ppm/°C beyond reference domain

Settling time: < 5 ms

Specifications given for CALYS configurations in:

- Active mode (+24V ON) 1 Meter in passive mode (+24 V OFF)
- Passive mode (+24 V OFF) 1 Meter in active mode (+24 V ON)

### Further features

|   |   |
|---|---|
| Scaling in measurement and simulation modes | Scaling allows process signals to be displayed in % of FS or in all other units. This function also allows sensors to be corrected after a calibration.   |
| Relative measurement                        | The features allows the following : <ul style="list-style-type: none"> <li>• Programming a reference value different from the one of the instrument (NUL function).</li> <li>• Subtracting of constant value by measuring or programming it from a measured value (TARE function).</li> </ul>   |
| Simulation menu                             | Simulation value is set by entering value on keypad or by changing the specific digit with the cursor.  |
| Square root                                 | In current measurement and simulation, this function allows taking into account a quadratic signal coming from transmitter of type ΔP.  |
| Statistical functions                       | Continuous display of average, minimum and maximum value of the signal under monitoring, as well as number of measurements.   |
| Ramps generation                            | Starting, ending and length time values of simple or cyclic ramps can be set to do simulation. Number of ramps can also be adjusted in case of cyclic ramps for any signals.  |
| Steps simulation                            | 2 modes are available: <ul style="list-style-type: none"> <li>• Program mode: Starting value, number of steps and the length time have to be set</li> <li>• Manual mode: User has about a hundred preset values</li> </ul> In current simulation, user will have some additional preset values in function of range and according to 0%, 25%, 50%, 75% and 100% from selected gauge. Choice is done between gauges:<br>0-20 mA: linear or quadratic<br>4-20 mA: linear or quadratic |
| Synthesizer                                 | With 100 values manually set, CALYS 50 enables users to draw a generation curve.  |
| Transmitter function                        | CALYS 50 is able to be used as a transmitter. Measurement input is copied on the output with scaling.   |

# Models and accessories

## Instrument:

CALYS50              On-site documenting multifunction calibrator

Delivered in standard with:

- User manual
- Battery charger
- Set of 6 testing leads
- Carrying strap
- Factory test report

## Accessories:

AN6050              Transport case for CALYS series

ACL9311              Set of 6 measuring cables with removable crocodile clips

ER 49504-000        USB cable

## Certification:

QMA11EN              COFRAC certificate of calibration

With all relevant data points where the device has been tested

## Packing information:

Size                    210 mm x 110 mm x 50 mm

Weight without packing    900 g
